

IN THE CLAIMS

*The status of the claims as presently amended is as follows:*

1. – 6. (Cancelled)

7. (Currently Amended) An image output apparatus comprising:

an image data reading section input element for inputting image data from a recording media, each of the image data including reduced image data and actual image data;

a printer output element for printing out the image data;

a control section a screen for displaying an image list display including a plural of selectable images based on the reduced image data, a detailed image display including a detail image of the selected image based on the actual image data, and an enlarged image display, including an enlarged image of the selected image based on the reduced image data on a screen;

a memory section for holding setting data which indicates whether or not to enlarge and temporarily display the reduced image data when transitioning from the image list display to the detailed image display; and

wherein, when the temporary display of the reduced image data is not performed based on the setting data, the control section switches directly from the image list display to the detailed image display, and when the temporary display of the reduced image data is performed based on the setting data, the control section switches from the image list display to the detailed image display via the enlarged image display.

wherein the image list display includes a plural of selectable images based on the reduced image data and a mechanism for switching the selected image to the detailed image, wherein the detailed image display displays a detailed image of the selected image based on the actual image data, and wherein the enlarged image display displays an enlarged image based on the reduced image data;

enlarged display setting element for performing setting in relation to whether or not the enlarged image display is displayed during a transition from the image list display to the detailed image display.

8. – 36. (Cancelled)

37. (Currently Amended) An image output method for an image output apparatus comprising an image data reading section ~~input element~~ for inputting image data from a recording media, a printer output element for printing out the image data, and a control section ~~a screen~~ for displaying an image on a screen, and a memory section for holding setting data, the method comprising:

inputting image data from the recording media ~~input element~~, each of the image data including reduced image data and actual image data ~~in each of the image data~~;

inputting the setting data which indicates whether or not to enlarge and temporarily display the reduced image data when transitioning from an image list display including a plural of selectable image to a detailed image based on the actual image to a detailed image display including a detail image of the selected image based on the actual image data;

switching directly from the image list display to the detailed image display when the temporary display of the reduced image data is not performed based on the setting data; and switching from the image list display to the detailed image display via an enlarged image display including an enlarged image of the selected image based on the reduced image data.

~~displaying an image list display including plural of selectable images based on the reduced image data and a button for switching the selected image to a detailed image based on the actual image;~~

~~displaying a detailed image display includes a detailed image of the selected image based on the actual image data when the button was operated to switch the selected image to the detailed image;~~

~~displaying an enlarged image display including an enlarged image based on the reduced image during a transition from the image list display to the detailed image display, when the enlarged image display is set;~~

38. - 39. (Cancelled)
